

CONNECTION TECHNOLOGY CENTER, INC.

CTC Connect Wireless Sensors Battery Shipping Compliance

CTC Connect Sensors require a battery to operate. The shipping of batteries is tightly regulated under various international and national guidelines to ensure safety. One of the primary regulatory bodies for air transport of dangerous goods is the International Air Transport Association (IATA), which sets global standards and regulations to ensure safe, secure, and efficient aviation. Ground shipment of batteries is regulated by each country's respective Department of Transportation or similar authority.

Please note, in addition to the requirements of the aforementioned regulatory bodies, it is important to contact your shipping carrier to understand their requirements. Shipping carriers impose their own internal safety policies and protocols that may require stricter packaging, labeling, or documentation. Please note, due to carrier specific policies, CTC can only ship CTC Connect products via FedEx.

CTC has undergone all necessary compliance training and certification requirements mandated by IATA, United States Department of Transportation, and FedEx for the shipping of our battery classifications. It is crucial for CTC distributors to be aware of and comply with these regulations to avoid any legal or safety issues.

Important Compliance Information:

CTC Connect Sensors are classified as UN3091 Section II due to the battery being contained inside the equipment.

CTC WSK Series Connect Line Wireless Starter Kits are classified as UN3091 Section II due to the battery being contained inside the equipment.

CTC Connect replacement battery packs are classified as UN3090 Section IB.

Please note, the shipping and packaging requirements are different for each classification.

If you wish to reship CTC Connect Sensors, Starter Kits, and Battery Packs via FedEx, we suggest reaching out to the FedEx dangerous goods hotline along with your FedEx sales representative. This is a free resource which can help you with this process.

FedEx Dangerous goods hotline: dghotline@fedex.com

If you do not wish to undergo the necessary steps to reship CTC Connect products, all CTC Connect products must be shipped from CTC to the end use destination.

This awareness notice is a good faith effort to educate all CTC distributors on the compliances required to ship batteries, and CTC is not liable to remind or enforce these practices. CTC is also not liable for any penalties incurred by unauthorized battery shipments performed by distribution partners.
