

DM92000

Reverse Mount Proximity Probe Housing

Product Features

Protect important proximity probe instruments in harsh manufacturing conditions. Easily adjust the gap between machine shaft and probe or replace an extension cable without machine shutdown.

- Convenient wrench flats for installation
- Viton® O-ring sealed probe sleeve and housing
- Crush washer included to seal sleeve interior between reverse mount probe & penetration sleeve

Specifications

Temperature Range: -31 °F to 340 °F (-35 °C to 171 °C)

Anodized Aluminum Body with 316L Stainless Steel Sleeve

Proximity Probe penetration depths from 0.5 in. to 12.5 in.*

3/4-14 NPT Mounting Thread

Weight: 2.5 lbs (40 oz) average weight with probe

Only compatible with reverse mount, 3/8-24 threaded probes

Optional standoff adapter allows for easier access for mounting and adjusting a proximity probe

IP66 Rated**

*If a standoff adapter is selected, penetration depth will be shortened by the height of the adapter. **PTFE tape utilized to seal NPT plugs.
