Equivalent and Compatible Hardware for SKF dBx (CMVA 90)

CTC offers a wide selection of the industry's most dependable condition monitoring hardware engineered for seamless compatibility with the popular SKF dBx (CMVA 90) data collector. Enhance your existing condition monitoring system with the unmatched power and precision of CTC hardware solutions.

ACCELEROMETERS

Featuring superior shear mode construction, welded hermetic seal, and durable 316L stainless steel case for the industry's best performance in the most demanding environments. Scan or click the QR codes to view CTC accelerometers on our website:
