SKF ONLINE MONITORING COMPATIBLE VIBRATION ANALYSIS HARDWARE

Table of Contents

- Accelerometers 2
- Accelerometers with Mounting Hardware 4
- Integral Cable Accelerometers with Mounting Hardware 5
- Cable Assemblies 7
- Connector Kits 8
- Cable and Connector Accessories 8
- Mounting Hardware 9

CTC offers a wide selection of the industry's most dependable vibration analysis hardware engineered for seamless compatibility with SKF online monitoring solutions. Enhance your existing online monitoring system with the unmatched power and precision of CTC hardware solutions.

Accelerometers

Featuring superior shear mode construction, welded hermetic seal, and durable 316L stainless steel case for the industry's best performance in the most demanding environments. Scan or click the QR codes to view CTC accelerometers on our website:

Connector Kits

Field-installable solutions that allow you to create your own cordsets. Kits come with a complete set of components including connector insert, sockets, and backshell to install on your desired cabling. Scan or click the QR codes to view CTC connector kits on our website:

SKF: CMSS 942-TL-05
CTC: CK-V2A (qty: 5)

Cable entry diameter:
0.190 in. (4.83 mm)

SKF: CMSS 943-TL-05
CTC: CK-V3A (qty: 5)

Cable entry diameter:
0.190 in. (4.83 mm)

Cable and Connector Accessories

Designed for efficient cable and connector installation for long-lasting performance in online monitoring applications. Scan or click the QR codes to view CTC cable and connector accessories on our website:
