Descripción general

El Portal de Distribuidores CTC es tu puerta de entrada a herramientas y recursos exclusivos diseñados para ayudar a los distribuidores autorizados a aprovechar al máximo su asociación. Hemos creado esta guía de visión general para ayudar a los usuarios primerizos a comenzar con su cuenta y familiarizarse con todas las emocionantes características disponibles en el portal.

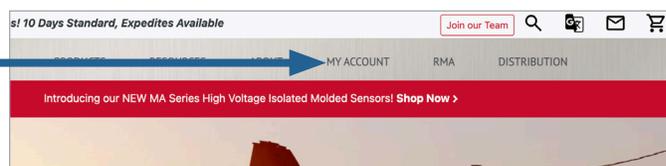

Registrándose para una nueva cuenta

Hay dos formas de crear una cuenta en el Portal de Distribuidores de CTC:

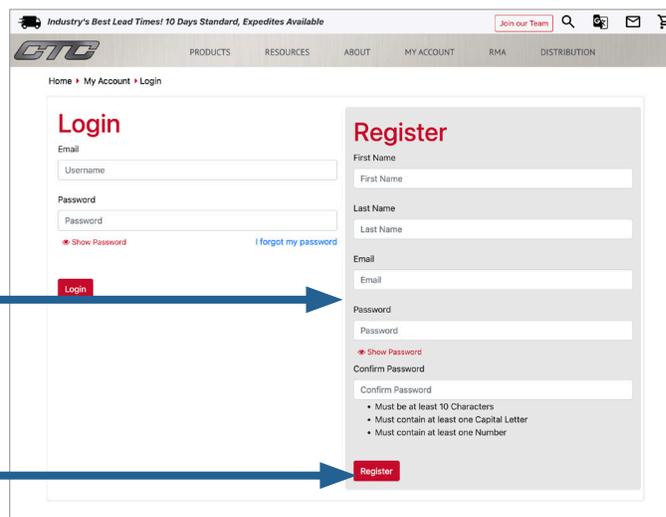

- » Registro propio
- » Contactar a su gerente de desarrollo comercial de CTC

Proceso de auto-registro

A Ve a ctconline.com y haz clic en **Mi Cuenta** en el menú de navegación.

B Complete todos los campos en la sección de Registro y luego haga clic en el botón rojo **Registrar** en la parte inferior.

Importante: Una vez que te hayas registrado, **DEBES** contactar a tu gerente de desarrollo empresarial y proporcionar el correo electrónico que utilizaste para registrarte con el fin de completar la activación de tu cuenta. **NO** tendrás acceso a todas las funciones del portal hasta que tu gerente de desarrollo empresarial haya completado la activación.

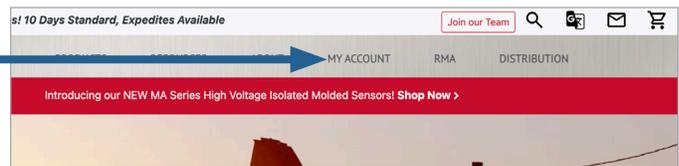

Contacta a tu gerente de desarrollo comercial para registrarte

En lugar de usar el formulario de registro de autoservicio, puede comunicarse directamente con su gerente de desarrollo comercial de CTC y solicitar que maneje el proceso de creación de cuenta por usted. Simplemente proporcione el correo electrónico que le gustaría usar como su inicio de sesión, luego su gerente de desarrollo comercial le proporcionará una contraseña temporal que usará para iniciar sesión la primera vez. Se le pedirá que cree una nueva contraseña en su primer inicio de sesión.

Iniciando sesión por primera vez

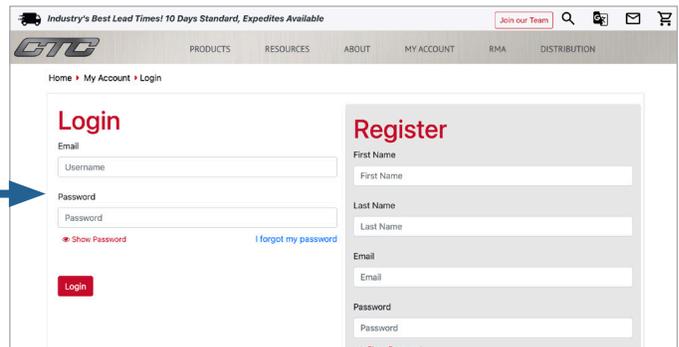

Una vez que hayas completado el proceso de autorregistro o recibido la contraseña temporal de tu gerente de desarrollo comercial.

- A** Ve a ctconline.com y haz clic en **Mi Cuenta** en el menú de navegación.

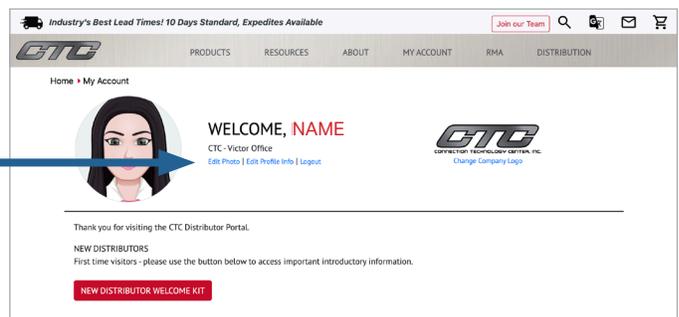

- B** Ingrese su correo electrónico y contraseña en la sección de inicio de sesión, luego haga clic en el botón rojo de iniciar sesión.

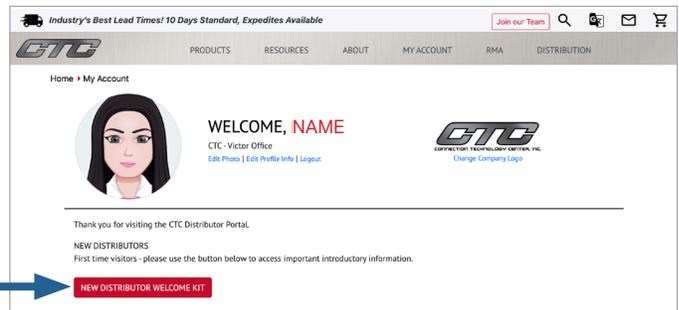

Por favor, tenga en cuenta que si recibió una contraseña temporal de su gerente de desarrollo comercial, se le pedirá que la cambie en este momento.

- C** Utiliza los enlaces para subir una foto de perfil, editar la información de tu perfil y agregar el logo de tu empresa.

- D** Revise nuestro nuevo kit de bienvenida para distribuidores para obtener información introductoria importante.

- Governing Law: Venue: This Agreement is made under, and will be construed according to, the laws of the State of New York, without giving effect to any choice of law or conflict of law provision or rule (whether of the State of New York or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the State of New York. You hereby expressly and irrevocably consent to jurisdiction and exclusive venue in the New York State Supreme Court in the County of Monroe or in the U.S. District Court, Western District of New York for any lawsuit arising from or related to these Terms or the Products. You agree, waive all defenses relating to, and specifically consent to the jurisdiction and venue of such courts for the resolution of all disputes related to these Terms or the Products.
- Entire Contract: These Terms contain the entire understanding of the parties and supersede all previous oral and written agreements, representations or warranties relating to the subject matter hereof. Create A Private Label Part Series

Requirements

Products available for private labeling include sensors, cables, proximity probe sets, magnets, and vibration test points. Signal conditioners are not currently available for private labeling. Must be an OEM customer to request a private-labeled CTC part. Physical modifications to standard CTC products (other than or in addition to the logo and other markings) are considered custom products and are subject to the warranty, return, and requirements of custom products. Should you wish to modify the product in a way that would change the build, please submit a Custom Part Request. We require a simplistic, monochromatic/1-color logo for successful engraving on the part. Accepted logo file formats include: DXF (preferred), AI, EPS. If one of the above file formats cannot be provided, CTC will be unable to accept your private label part request. The requested part number must consist of only: Capital Letters, Numbers, Backslashes, Dashes. Requested part numbers may not contain special characters, such as: Underscores, Periods, Spaces, Symbols/glyphs. Private label sensors, cables, magnets, and proximity probe sets are subject to a minimum order quantity of 10 pieces per part number. If you wish to receive a first piece sample for new private-label parts, please contact your sales manager to assist you. While CTC requires that you place a minimum order of at least 10 pieces, your sales manager would be happy to assist you with an order split so that you may receive the first piece sample before releasing the remainder of the order. *Please note, this only applies to the first order for a new part. Private label parts may not be split into an order quantity of fewer than 10 pieces after the first piece sample has been approved.

CTC Information & Tips For Distributors

- 1 New Custom and Private Label Products**

All requests must be submitted through our Custom & Private Label Parts Portal: <https://ctconline.com/about/custom-private-label-parts/>

Please expect a one-week turnaround time for approval/denial of the project. For private label parts, please allow an additional week after approval for part setup. During this time, you will receive a print to sign and approve. **Please do not submit a PO for your part before it is completely set up.** The total minimum turnaround time before a private label part can be ordered is two weeks.

For custom parts, you will receive an estimated timeline at the time of project approval. This is because there may be extra time involved if new/additional parts must be sourced for your project. **Please do not submit a PO until you have received the green light from your regional business development manager.**
- 2 Product Manuals**

CTC provides comprehensive manuals and wiring diagrams for all relevant products. All manuals are posted on the individual product pages, as well as on the Manuals page on our website: <https://ctconline.com/resources/product-manuals/>
- 3 STP Files and CAD Drawings**

CTC does not provide CAD drawings to customers. However, we do provide STP files which should suffice for all needs.

STP files are posted on individual product pages. If it appears a STP file is missing, please contact your business development manager.
